CONNECTED SOCKETS
ROOMS (server side)
EVENTS EMITTED
Admin socket
valid JWT
Customer socket
valid JWT
Agent socket
valid JWT
Anonymous socket
no JWT (public page)
auto-join on connect
auto-join on connect
subscribe:parcel
(owner check)
subscribe + correct
tracking code
× wrong code: not joined
role:admin
user:<own id>
parcel:<id>
parcel:created
new bookings
parcel:update, parcel:location
status, assignment, stored position
agent:location:update
only for the agent's active parcels
No event is broadcast to every socket. Each emission targets named rooms only, so other customers and anonymous viewers never receive unrelated data.
