
Rules enforced by the server (`transitionError`)

- ▷ Only the **assigned agent** may change a parcel's status as an agent.
- ▷ Agents move only **forward**, or to Failed while active; forward skips are allowed (e.g. Assigned → Delivered).
- ▷ Administrators may change any non-final parcel to any other state.
- ▷ Delivered and Failed are **final**; (re)assignment is possible only while Pending or Assigned.
